

Environmental Policy

V3.1 2024

Steeldeck Rentals Ltd recognises its responsibility for the environment and we are committed to minimising the environmental impact of our operations and to becoming fully carbon neutral by 2035. We will comply with all current and future environmental legislation and strive to comply, insofar as is reasonably practicable, with all relevant codes of practice.

We will achieve this through our commitment to:

- Assess the company's environmental impact through delivering temporary demountable structures to the entertainment industry.
- Reduce the amount of waste produced and encourage the use of recycled rather than virgin materials. Where this is not possible materials will be sourced from a supplier who complies with a sustainable procurement policy (ie FSC Timber)
- Encourage recycling within depots and provide necessary training to staff to enable them to discharge their responsibilities with their environmental impact in mind.
- Improve resource efficiency, specifically regarding our use of energy and water, office supplies and both internal transport and hauliers.
- Sustain a programme of continual improvement in environmental performance incorporating suitable measurement and monitoring mechanisms, for example, calculating our carbon footprint and develop methods to reduce at and where that is not possible, offset our carbon emissions through a recognised and reputable offsetting scheme.
- Offer transparency in our processes to reduce our impact on the environment.

The company will foster environmental awareness in all employees, suppliers, customers, and subcontractors.

We recognise our position in the events community and the unique position we have to inspire others to take positive action. Where practicable, the company will supply customers with information and assistance on environmental issues arising from its services.
